Re: **Ex Parte Presentation**

CG Docket No. 03-123

Dear Ms. Dortch:

On August 13, 2008, a conference call was held among the following individuals: Andy May, William Cobb, and John Harris of CSDVRS, the undersigned serving as outside counsel for CSDVRS, George Lyon, outside counsel for GoAmerica, Nicole McGinnis and Thomas Chandler of CGB, and Nick Degani and William Dever of WCB. The purpose of the call was to discuss a conflict in the FCC's Report and Order requiring ten-digit numbering, concerning the obligations of default providers and former default providers with respect to updating IP routing information to the central database. Specifically, the rule states that the provider that has distributed end user video equipment is not permitted to collect any routing information to update the central database once the recipient of that equipment ports his or her number to a new default provider. However, it is precisely this provider that has the ability to update the database with routing information provided by through the device it had given to that user. The new default provider does not have access to the routing information needed to provision the central database with updated IP address information.

This filing is made in accordance with Section 1.1206(b)(2) of the Commission's rules, 47 C.F.R. § 1.1206(b)(2). Please contact the undersigned if there are any questions about this filing or the ex parte presentation.

Sincerely,

Karen Peltz Strauss
